

SELENA WALSH SMITH

API DEVELOPER

(360) 481-9095

selenawalshsmith.github.io

selenawalshsmith@gmail.com

LANGUAGES, STACKS, AND SKILLS

- React.js
- JavaScript
- RESTful APIs
- HTML5 & CSS
- Node.js
- Express.js
- MVC Architecture

EDUCATION

The Evergreen State College
Bachelor of Science,
Emphasis in Computer Science

PROFESSIONAL EXPERIENCE AND PROJECTS

API Developer

General Motors
Customer Loyalty Program, Siebel CRM
November 2020 - present

- Developed API wrappers to integrate external endpoints to the Siebel application. In depth troubleshooting was required for these API integrations, working with Oracle support and application administrators
- Developed a system of automated emails triggered by account changes, including ability for CRM administrators to customize email templates
- Developed an API for loyalty members to find the potential loyalty point earn from a new vehicle

Front End Developement Intern

Edurange, a virtual cybersecurity classroom, funded
by the National Science Foundation
June 2019 - June 2020

- Self-led design and implementation of various front-end features
- Collaborated with other developers to deliver a dynamic, full stack web app used by undergraduate cybersecurity courses
- Addressed troubleshooting, maintaining and documenting code
- Developed exceptional skills in independent technical research

React Developer (Personal Project)

<https://robinhood100.netlify.app/>
Robinhood 100, a front end web application
August 2020

- Stack: CSS, REACT.js, Node.js, Express.js
- Independently developed
- Uses a Robinhood API to gather data about 100 stocks with the highest volume traded on their brokerage platform
